Update Designing Spaces that Bring Communities Together based on project type!

COLLAB ARCHITECTURE

DESIGNING SPACES THAT BRING COMMUNITIES TOGETHER

“Bringing the power of collaborative design to create a stronger, better, and more sustainable community.”

Update map if relevant (use snazzymaps), otherwise remove.
Negative space is fine!

WHO WE ARE

Collab Architecture is a Windsor-based firm specializing in recreation and community-focused projects. For three years in a row, we have been named one of the fastest growing private companies in Northern Colorado and the Front Range. We strive to always put the client first and emphasize the cooperative effort for each project. We have a holistic approach to every project, which starts with two fundamental questions. What design problem are we looking to solve, and how can we make the project the most successful for our client? It all starts with listening. **“Stop. Collaborate and Listen”, is our unofficial motto, and we push to live by those words.** We intend to listen and learn from our clients as much as they will from us during this process. This collaborative approach has proven to be successful, and has helped us to mitigate preventable issues early in the design process.

FIRM CAPABILITIES & RESOURCES

We provide full-service commercial architecture with in-depth experience on projects ranging from small remodels and tenant finishes to large ground-up structures. No two projects are the same, as each is designed to meet a different set of needs, a unique site, a specific program, and a variety of desired outcomes. We work with the client throughout the entire design process, from concept through occupancy, to ensure that project goals are met and expectations are exceeded, so that we can all walk away with projects we are proud of.

WORK LOCATION

**9217 Eastman Park Drive, Unit 3
Windsor, Colorado 80550**

Are we close to the project site - use a map similar to the right and talk about our ability to be onsite. Our office is located just 15 minutes from the project site, allowing our team to maintain a strong onsite and in-person presence throughout the project.

COLLAB ARCHITECTURE

OUR VALUES

COLLABORATION - All great design stems from the cumulative efforts, knowledge, and experiences of the team. We value the perspective and insight of our clients throughout the process and in return provide them with the expertise needed to realize their vision to its fullest potential.

COMMUNITY FIRST - Community is at the heart of what we do, and creating spaces that enable society to thrive is our primary goal. We strive to instill a sense of place and community pride in each and every project, no matter the size or scope.

CREATIVE SOLUTIONS - Each architectural project is about solving a problem. To deliver the best results, our team is focused on evaluating the project from all angles to provide innovative and productive solutions that align with the project goals.

“Community is at the heart of what we do.”

Our team is deeply invested in the local communities we serve, whether through the spaces we design or the work we do to give back in meaningful ways. From assisting with design services to raising funds, providing mentorships, and collecting essential items, we partner with organizations across Northern Colorado to make a positive impact.

We host two annual fundraisers to support various causes, and the organizations we work with include Respite Care, CASA of Larimer County, Greeley-Weld Habitat for Humanity, ACE Mentorship, GEMS (Girls in Engineering, Math, and Science), Colorado Youth Outdoors, Food Bank for Larimer County, Weld Elves, Alternatives to Violence, Housed Working and Healthy, and more. These efforts reflect our dedication to fostering strong, local communities and ensuring that our contributions go beyond design to create lasting change.

In the past five years, our firm as donated over \$717,000 to local organizations across Colorado.

Update this page according to the project! Swap photos & update title on expertise and narrative.

COMMUNITY CENTER PLANNING & DESIGN EXPERTISE

Our team brings specialized expertise in the planning and design of community and recreation facilities that serve residents of all ages. From town-run recreation centers and senior hubs to multi-generational community buildings and wellness-focused public spaces, we've delivered successful projects across Colorado that foster connection, activity, and inclusivity.

To lead programming and feasibility, we've partnered with Chris Kastelic—a nationally respected expert in recreation and community facility design. His insight and experience help translate community needs into facilities that are sustainable, flexible, and operationally successful.

COLLAB ARCHITECTURE

Designing Spaces that Bring Communities Together.

Update!

Who We Are

Collab Architecture is a Windsor-based architecture and planning firm recognized as one of the fastest growing private companies in Northern Colorado and the Front Range. At our core, we're driven by a collaborative spirit and a deep commitment to listening, because thoughtful design starts with understanding.

Our unofficial motto, "**Stop. Collaborate and Listen,**" reflects how we work. Every project begins with curiosity, humility, and honest dialogue. We don't bring pre-packaged solutions. Instead, we ask the right questions, define success with our clients, and build lasting partnerships. This mindset helps us surface challenges early, align stakeholders, and create spaces that serve people and purpose.

Firm Qualifications & Differentiators

We don't take a one-size-fits-all approach. For the Rifle Field House, we've assembled a team specifically aligned with your goals, bringing together deep experience in municipal recreation planning, public engagement, and feasibility analysis across Colorado.

Our leadership team, Jordan Lockner, Bryan Merritt, and Michael Aller, brings strong project management, design, and technical expertise, with a focus on constructability, cost-efficiency, and community-driven outcomes. We're known for delivering forward-thinking solutions that are practical, buildable, and grounded in local context.

To lead recreation planning and feasibility, we've partnered with Chris Kastelic, a nationally respected expert in recreation facility design. His insight and experience help translate community needs into facilities that are sustainable, flexible, and operationally successful.

stop, collaborate, & listen.

Recreational Planning Expertise

Our team brings deep expertise in the planning and design of recreation spaces that serve diverse populations and facility types. From municipal field houses and regional recreation centers to private athletic clubs, university wellness facilities, K-12 gymnasiums, and senior or community centers, we've worked across Colorado and beyond to deliver spaces that promote wellness, connection, and inclusivity.

We understand how to balance programmatic needs with long-term operational success—whether through flexible multi-use spaces, sport-specific environments, or amenities like aquatics, indoor turf, fitness, and walking tracks. Our work is rooted in community engagement, practical analysis, and future-ready design, ensuring each facility reflects local priorities while remaining adaptable to evolving trends.

Above: XX

"From the beginning, Collab demonstrated a strong commitment to collaboration. They listened closely to the Town's needs, incorporated stakeholder input, and translated complex priorities into clear design solutions. Their ability to communicate concepts through graphics, presentations, and construction documents was key in building community understanding and support. Notably, the marketing materials they developed helped articulate the project vision to a wide audience and still serve as a valuable reference on our website.

This expansion is one of the Town's most important investments in recent years, and its success is vital to maintaining public trust. Collab's approach not only aligned with our goals but also elevated them, creating a design that reflects Silverthorne's values. Their consistent delivery of quality work on time has helped protect our reputation, and their professionalism has built strong relationships with our staff, contractors, and community."

- Steven Herrman
Park, Recreation, Open Space & Trails Director
